## Regional Vocational Aquaculture Program

The Sound School Regional Vocational Aquaculture Center is an accredited inter-district, college preparatory high school, one of the 19 Vocational Agriculture Centers in Connecticut, and a part of the New Haven Public School System. One of the first (full-time center, 1981) to concentrate on the study of aquaculture and marine trades. The Sound School's comprehensive educational program prepares students for college, technical schools, or for entering employment upon graduation. Our curriculum includes extensive exposure to on-the-water and water related activities and coursework such as nautical drafting, aquaculture production, building and vessel handling and safety at sea. Our New Haven students may opt to study the more traditional vocational agriculture program which includes courses in plant science, animal science, agriculture mechanics, and veterinary science. Located on the banks of New Haven Harbor and in historic Oyster Point, The Sound School boasts a five building campus with sweeping water views. This is the ideal location for our unique high school program with its dual focus on marine and agriculture sciences and technology.

Number of Participants	340 - 4 year program
Number Achieving Program Goal	Average of 77 graduates annually
Size of Budget	
Number of Employees	50
Number of Volunteers	Parent group Average 40
